

1. DASHBOARD

Purpose

The command centre of the app.

Gives parents a quick snapshot of everything happening today and upcoming.

How It Works (MVP)

- Displays:
 - Today's tasks (from Planner)
 - Upcoming events
 - New notifications
 - Latest Feed updates
 - Child quick-view cards
- Personalized per parent account
- Auto-prioritized by urgency (time-based logic)

Core Logic

- Pulls data from:
 - Planner table
 - Notifications table
 - Feed table
 - Child Hub records
- Time-sensitive sorting (e.g., tasks within next 24 hours first)
- If multiple children → grouped or filterable by child

Integrations

- Planner
- Notifications
- Child Hub
- Calendar API (Google/Apple optional for V2)

User Story

As a busy parent, I want to open the app and instantly see what matters today, so I don't miss anything important.

Result

Less mental load. Faster decision-making.

August 2026 Full Launch

- Insights panel (sleep patterns, routine tracking)
- Quick action buttons
- Widget version (iOS/Android)

Future Upgrades

- Smart AI prioritization (“Today looks busy — want to reschedule?”)
- Predictive recommendations
- Co-parent sync dashboard
- Multi-household support

2. NOTIFICATIONS

Purpose

Ensure nothing is missed.

How It Works (MVP)

Push notifications for:

- Planner reminders
- Feed activity (**In V2**)
- Child Hub updates
- Needle alerts (optional)

Core Logic

- Trigger-based system
- Time-based reminder engine
- Preference controls

Integrations

- Firebase Cloud Messaging
- Apple Push Notification Service

User Story

As a parent, I want reminders, so I don’t forget important things.

Result

Retention engine.

August 2026 Full Launch

- Smart notifications

- Quiet hours
- Urgency tier system

Future Upgrades

- AI urgency detection
- Wearable integration

3. PROFILE (Parent + Child)

Purpose

Identity layer of the system.

How It Works (MVP)

Parent Profile:

- Name
- Location
- Email
- Bio
- Parenting stage

Child Profile:

- Name
- Age
- Medical info
- Allergies
- Hobbies
- Food preferences

Core Logic

- Multi-child support
- Editable records
- Data privacy layers

Integrations

- Authentication system
- Child Hub

User Story

As a parent, I want my child's details saved once so everything else in the app connects to it.

Result

Foundation for personalization.

August 2026 Full Launch

- Co-parent linking
- Privacy tiers
- Profile verification badges

Future Upgrades

- Family tree mapping
