

NEEDLE

“Find What Your Family Needs — Instantly.”

Purpose:

Enable parents to quickly find and connect with the nearest relevant products and services based on immediate needs.

1 Core Purpose

Needle helps parents:

- Instantly locate nearby child-related products and services
- Filter by urgency, age group, rating, distance, availability
- Get trusted, parent-recommended options
- Reduce stress in urgent moments

It solves:

“Where can I get this right now?”

Examples:

- Closest pediatric clinic
- 24/7 pharmacy
- Baby formula in stock
- Nearby daycare
- Soccer club for 6-year-olds
- Speech therapist nearby
- Birthday party venue

2 Core Value Proposition

Needle =

Google Maps + Yelp + Parenting Context + Trust Layer

But hyper-focused on:

- Families
- Children
- Safety

- Speed

How It Works (System Logic)

Location-Based Logic

Step 1:

User enables location

Step 2:

System fetches:

- Nearby services
- Within customizable radius (5km / 10km / 25km)

Step 3:

Results ranked by:

- Distance
- Rating
- Verified status
- Parent recommendations
- Urgency relevance

Search Intelligence Logic

Needle supports:

1. Category Search
 - Healthcare
 - Education
 - Activities
 - Retail
 - Religious
 - Emergency
 - Food
 - Services
 - Products
2. Smart Filters: **Basic Filters (MVP Must-Have)**
 - Age suitability

- Price range
- Open now
- Insurance accepted
- In stock (**future**)
- Verified by Famify (**Monetization and could be in V2**)
- Accessibility
- Distance radius (1km, 5km, 10km, 25km)
- Ratings
- Product vs Service toggle

Optional Smart Filters (if feasible)

- Delivery available
- Insurance accepted (for health services)
- Parent-recommended
- Verified vendor (Monetization)

3. Urgent Mode:

“Need this now”

- Only shows currently open
- Highlights emergency options
- Sorts by proximity

Core Components

A. Search Bar

- Text search
- Voice search (future)
- Quick chips:
 - Doctor
 - Pharmacy
 - Daycare
 - Activities
 - Supplies

B. Map View + List View

Toggle:

- Map view
- Scrollable list view

Each listing shows:

- Name
- Distance
- Rating
- Open/Closed status
- Short description
- Call button
- Directions button
- Save button

C. Business Profile Page

Includes:

- Full details
- Photos
- Reviews
- Age group served
- Pricing indicator
- Website
- Contact
- “Add to Planner” option
- “Save to Favorites”

5 User Flow / User Journey

Scenario 1: Urgent Need

Parent opens app

→ Taps Needle

→ Types “24-hour pharmacy”

→ Enables Urgent Mode

→ Filters “Open Now”

→ Selects closest

- Gets directions
- Saves for future

Total time: under 20 seconds.

Scenario 2: Activity Discovery

Parent:

- Searches “soccer 5-year-old”
- Filters by rating
- Reads reviews
- Saves to Planner
- Books consultation (future integration)

Scenario 3: Supply Emergency

Parent:

- Searches “baby formula”
- Filters “in stock” (future)
- Finds nearby store
- Calls directly

6 Integrations (MVP vs Full Launch)

MVP Integrations

- Google Maps API (if approved)
- Location services
- Basic business database
- Manual listing curation (initial phase)
- Direct call integration
- Save to Planner integration

Admin / Data Side (Important for MVP)

- For V1, data can come from:
- Curated database (manually seeded)
- Google Places API (if approved)
- Local business onboarding

You do NOT need a massive database at MVP — just enough to validate usefulness.

Full Launch (August 2026)

Must include:

- Live inventory integration (major retailers)
- Appointment booking API (clinics/daycares)
- Verified business badge system
- Business dashboard portal
- Sponsored placement system
- Real-time availability
- Insurance filtering
- School/sports club onboarding portal

7 User Stories

Parent

As a parent, I want to quickly find trusted services near me, so I don't waste time during urgent situations.

New Parent

As a first-time parent, I want verified recommendations, so I feel confident choosing providers.

Business

As a daycare, I want to appear when local parents search for childcare.

Things to Include for Full Launch 2026

To be investor-ready:

- Verified provider badge system
- Review moderation system
- Business onboarding portal
- Analytics dashboard for businesses
- Smart recommendation engine
- “Parents also searched” logic
- Emergency quick-tap mode
- Community-curated lists
- Sponsored placements
- Data privacy compliance (very important)

Future Upgrades

- AI predictive search
- Behavior-based recommendations
- Dynamic pricing alerts

- Waitlist integration
- In-app booking and payments
- Family discount partnerships
- Live chat with providers
- Insurance coverage integration
- Real-time stock APIs

11. Free Version (Parents)

- Basic search
- Map view
- Limited filters
- Save favourites

12. Safety & Trust Layer

Because this involves children:

- Verified businesses badge
- Review moderation
- Report listing feature
- Safety guidelines
- Privacy-first design

This builds parent trust.

13. Result of This Feature

Needle will:

- Increase daily app opens
- Attract local businesses
- Generate revenue opportunities
- Position Famify as a family infrastructure app
- Increase investor appeal

Strategic Advice for MVP

Do NOT overbuild.

For V1:

- ✓ Basic search
- ✓ Google Maps integration
- ✓ Category filters
- ✓ Save to Planner
- ✓ Call & Directions
- ✓ Manual curated listings

Skip:

- ✗ Live inventory
- ✗ Booking system
- ✗ AI suggestions
- ✗ Business dashboards

Build clean. Expand later.
